

Smart City: To IOT or Not to IOT?

Connecting the Campus and the City

John Madey, RCDD / University of Florida

Today's Roadmap

- UF Overview
- IOT – example from GPD
- Smart City – wireless pilot with Gainesville
- Evolution of Campus Outdoor Wireless
- Smart City – the other opportunities

UF Fast Facts

- 56,500 students
- #7 Public University
- #1 Biotech Incubator
- Research Focused:
\$838M in Awards
- 2,000 Acres
- 1,000 Buildings

UF Information Technology

- Vice-President / Chief Information Officer
- Infrastructure and Communications Technology
- Academic Technology
- Business Center
- Enterprise Systems
- Information Security Office
- Research Computing

UFIT Overview

Communication & Construction Services

- Network Infrastructure: Field Engineers and Techs – Building network support
- Telecom: VoIP Infrastructure, Cisco Call Managers, IP Contact Center, Voicemail
- Emergency Communications: InformaCast, Blue Lights, E911
- Engineering: Design reviews, Telecom standards
- ISP: Inside Plant Cabling
- OSP: Outside Plant Fiber

IOT Data Collection

- An example of the vast amount of data collected through IOT
- Provided by Gainesville Police Department at City Commission request (10 FEB 2020)

Local RMS (Records Management System)

Requests for local involvements
with an individual

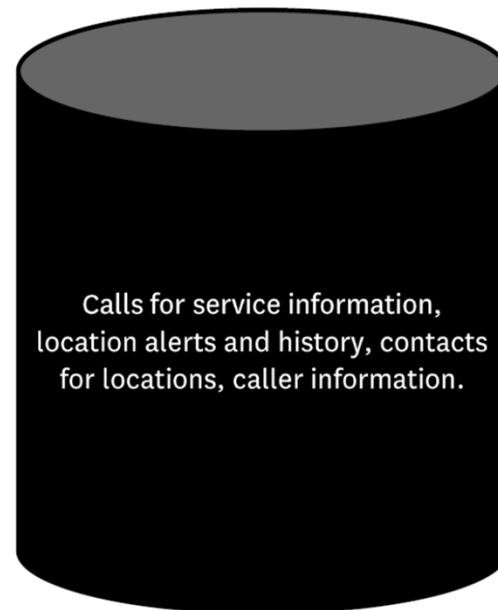

Return local involvements

Local CAD (Computer- Aided Dispatch)

Requests call history for a location

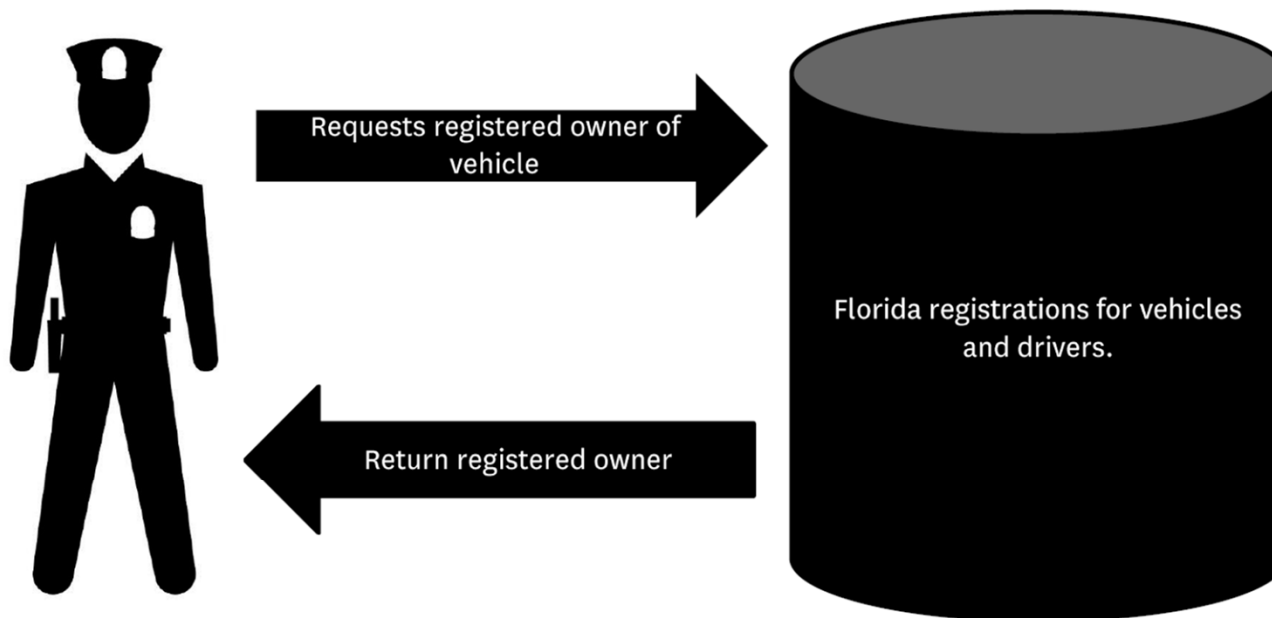

Return location history and alerts

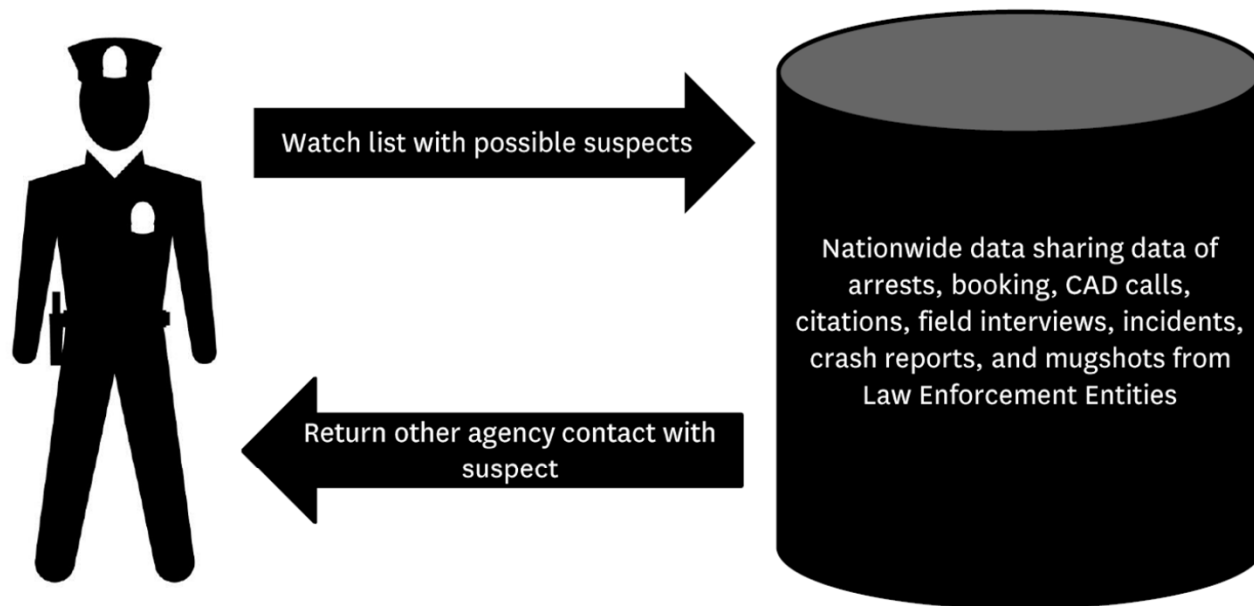

FCIC/NCIC (Florida Crime Information Center/National Crime Information Center)

DAVID/DHSMV (Driver and Vehicle Information Database/Dept. of Highway Safety and Motor Veh.)

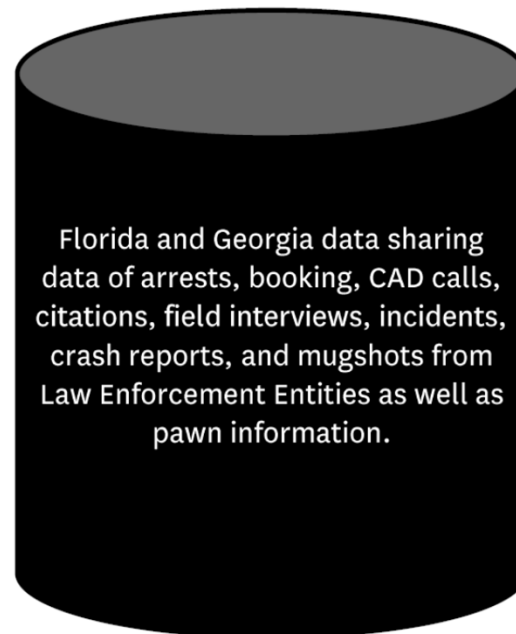

LInX (Law enforcement Information eXchange)

FINDER (Federated Integrated Network for Data Exchange & Retrieval)

Search property for being pawned

Return pawn information

LeadsOnline

Search property for being pawned

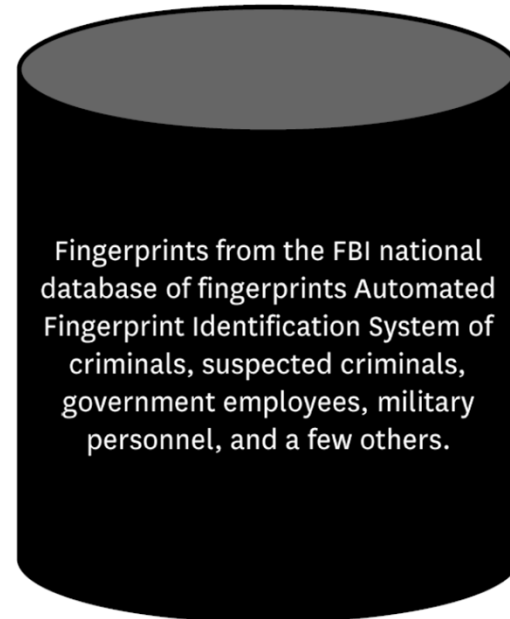

Return pawn information

AFIS (Automated Fingerprint Identification System)

Search fingerprint of suspect.

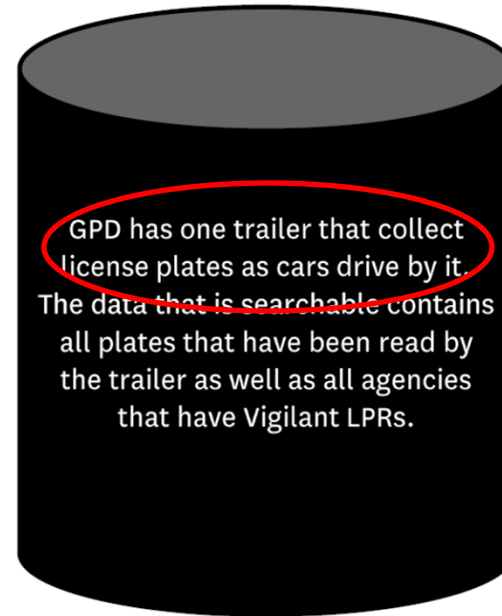

Fingerprints from the FBI national database of fingerprints Automated Fingerprint Identification System of criminals, suspected criminals, government employees, military personnel, and a few others.

Return suspect information.

Vigilant LPR (License Plate Reader)

Search tag of suspect car.

Return if car was captured by a Vigilant LPR.

Taser Evidence.com

Search interview by officer of an individual

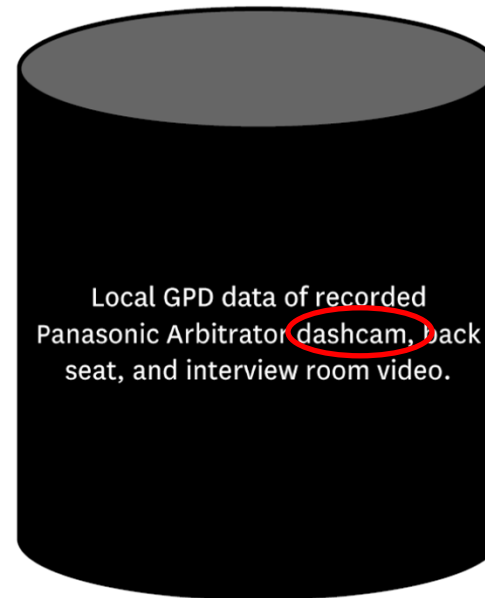

Return interview.

Panasonic Arbitrator System

Search of interview with suspect.

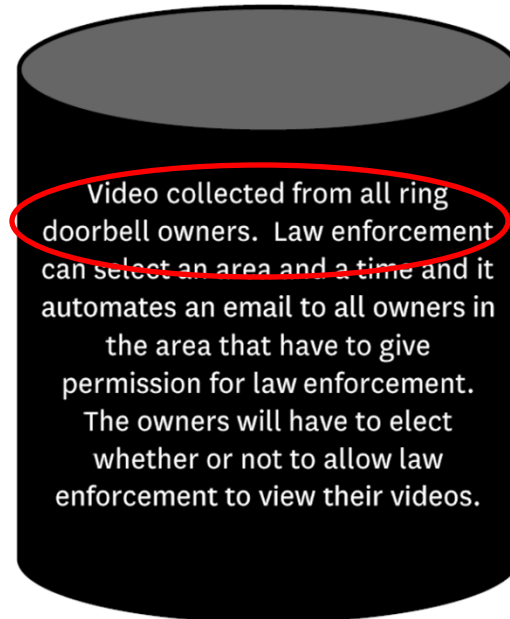

Return interview.

ring Neighborhoods Portal

Request access to a video in an area of a crime.

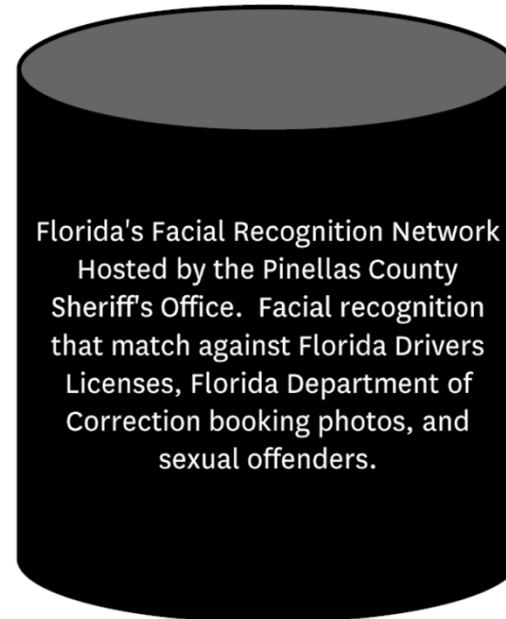

Return videos of possible leads if permitted by owners.

Source: <https://support.ring.com/hc/en-us/articles/360031595491-How-Public-Safety-Agencies-Use-Neighbors>

FACES (Face Analysis Comparison & Examination System)

Search legally obtained image of suspect.

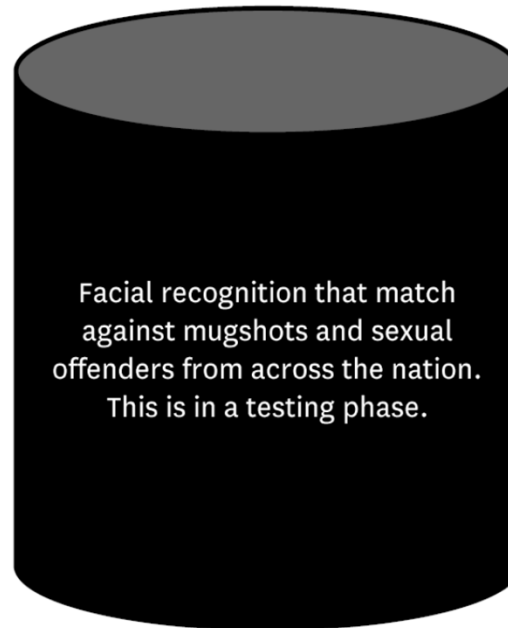

Return suspect information.

VIGILANT FACESEARCH

Search legally obtained image of suspect.

Return suspect information.

ClearviewAI

Search legally obtained image of suspect.

Return suspect information.

Successful examples of ClearviewAI by Gainesville Police Department

Countless Retail theft cases solved...Several thousands in losses

South American Theft Group- Professional Pickpocket who targets Panera Bread customers and uses stolen credit card to purchase gift cards, high end electronics. Eventually located in Illinois. GPD Case Report- 19-009712, 19-12477, 19-13977, 19-13994

Facebook hit on a friends page.

The New York Times

The Secretive Company That Might End Privacy as We Know It

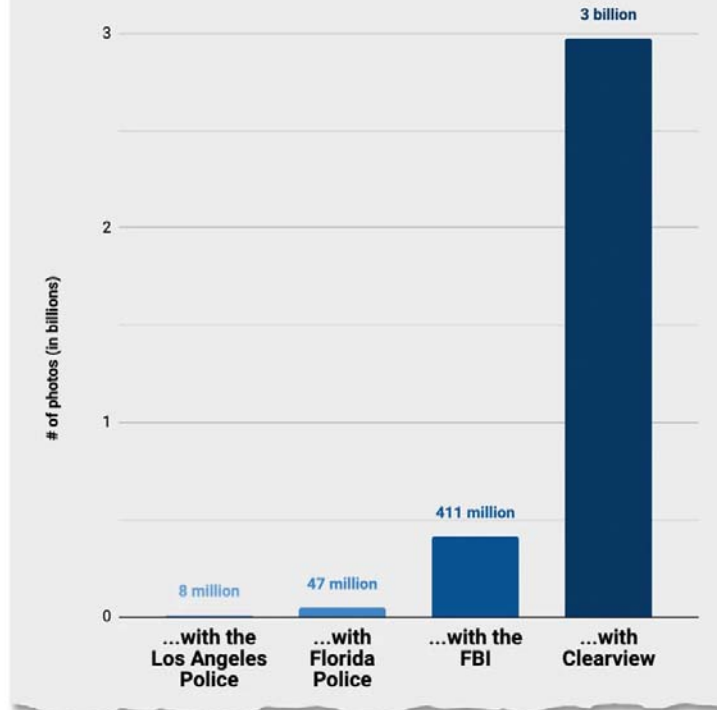

A little-known start-up helps law enforcement match photos of unknown people to their online images — and “might lead to a dystopian future or something,” a backer says.

New York Times Article

By Kashmir Hill
Published Jan. 18, 2020

This is how many photos you can search...

Source:

<https://www.nytimes.com/2020/01/18/technology/clearview-privacy-facial-recognition.html>

A chart from marketing materials that Clearview provided to law enforcement. Credit...Clearview

Detective Sgt. Nick Ferrara in Gainesville, Fla., said he had used Clearview's app to identify dozens of suspects.
Credit...Charlotte Kesl for The New York Times

"... "With Clearview, you can use photos that aren't perfect," Sergeant Ferrara said. "A person can be wearing a hat or glasses, or it can be a profile shot or partial view of their face."

He uploaded his own photo to the system, and it brought up his Venmo page. He ran photos from old, dead-end cases and identified more than 30 suspects.

In September, the Gainesville Police Department paid \$10,000 for an annual Clearview license...."

IOT Considerations

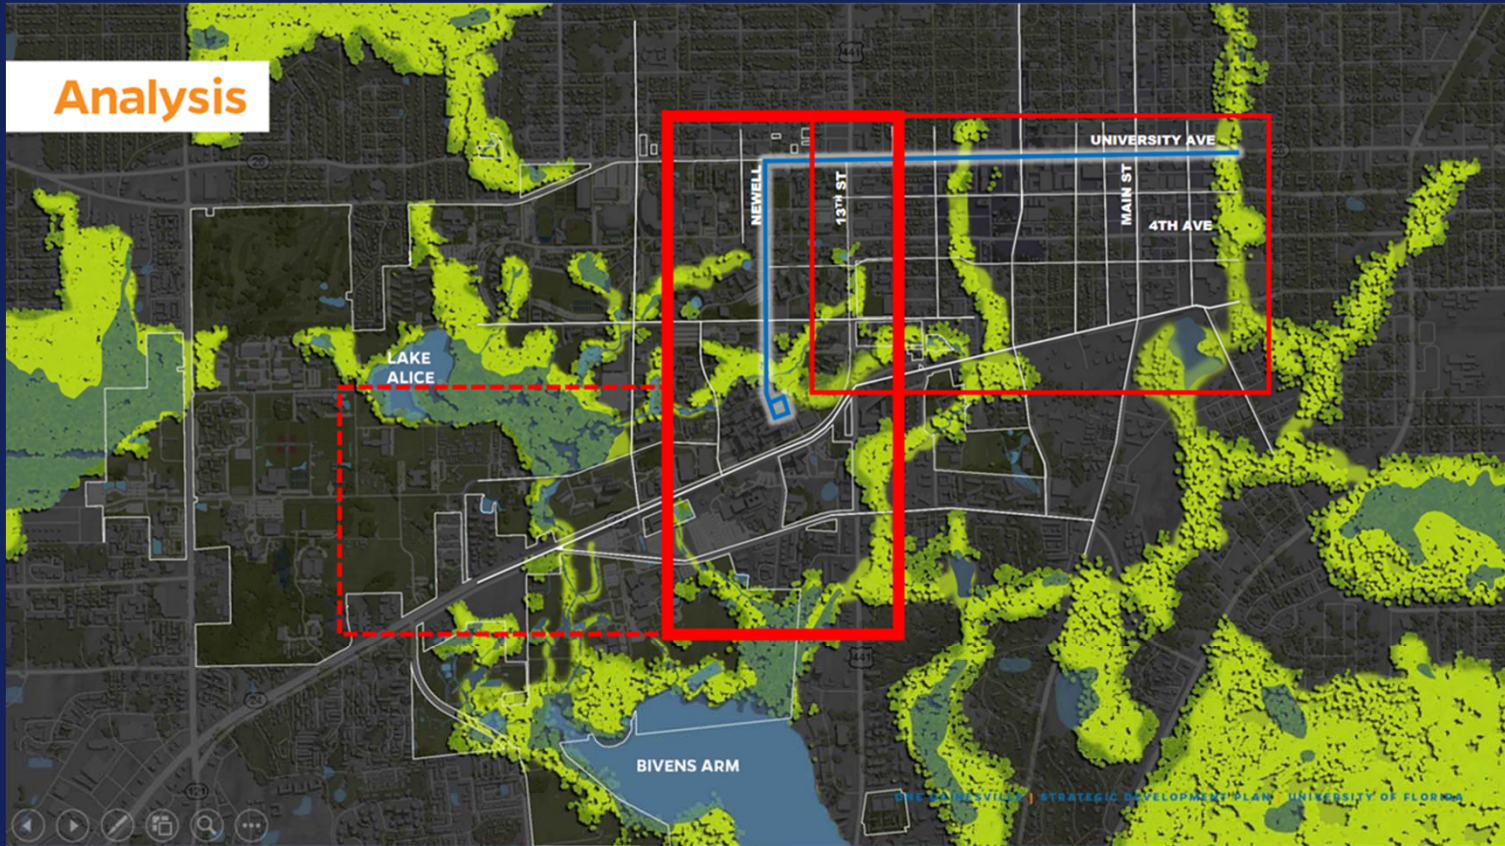

- Privacy
- How is the data secured
- Who owns the data
- How used / shared
- Legality

		Total Estimate per Access Point:		\$ 5,650.00

*UF Furnished and Installed Estimate

Proposed Schedule

- January 2019:
 - Finalize design
 - Secure quotes and confirm budget
 - Order materials
- February – April 2019
 - Build: University Avenue Outdoor Wireless Expansion
 - Build: SW 13th Street Outdoor Wireless Expansion
- May 1, 2019
 - On-Air
 - Optimization and Network Segmentation

Project Assumptions

- UF provided access points served by network locations from campus buildings
- Sufficient power source readily available for use of DC power supplies and/or POE extenders
- Weather, building permits, UF inspections, material acquisition do not delay schedule significantly

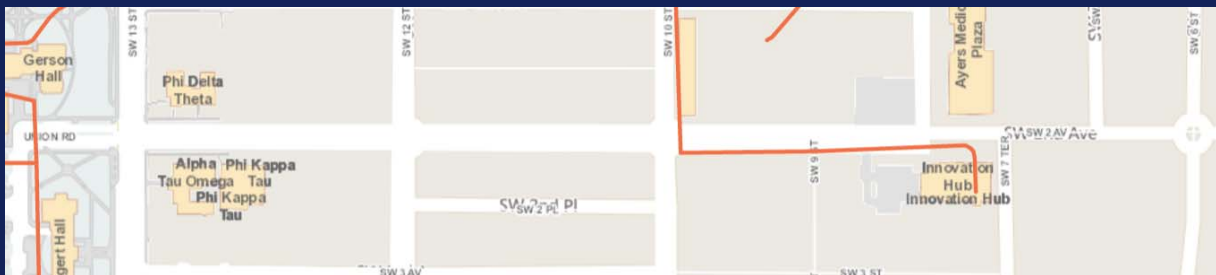

Next Steps

- Notice to Proceed
- PPM Project Creation
- Finalize Design
- Quotes for UF Install
- Coordinate AP Placement with Facilities Services
- Finalize Schedule
- Execute

Installation and coordination

POC Action Items

- Cabling Contractor work in process
- Wireless Access Points for UF Buildings
 - Design complete and materials being received
 - 800 Building work bidding now
- Need to confirm how additional access points will be connected:
 - City owned utility and communications provider no longer an option
 - Can Cable Co. provide?
 - City pay for conduit?

Haisely Lynch Park

- Cox Communications collaboration
- UFIT:
 - Set up subnet and made DNS changes
 - Tested AP connectivity to wireless controllers in Lab
- Scheduling mounting APs

Workflow

1. Survey: RF Benchmarking
2. Design: Certified Ekahau wireless design engineers
3. Procurement: Longer lead times
4. Installation
5. Testing & Documentation
6. Tweaking
7. Re-survey: confirm coverage and capacity

Proposed Access Points -- Cultural Plaza

Currently Parking Garage-11 has 4 Cisco AP3802i access points. 1 access point in the Harn Museum Parking Booth and 1 Directional Access point in front of the Performing Arts center.

Coverage is limited use for Covid-19 Testing on the first floor of the garage, partial coverage of parking lot near the Harn Parking booth , and Front entrance of the Performing arts center.

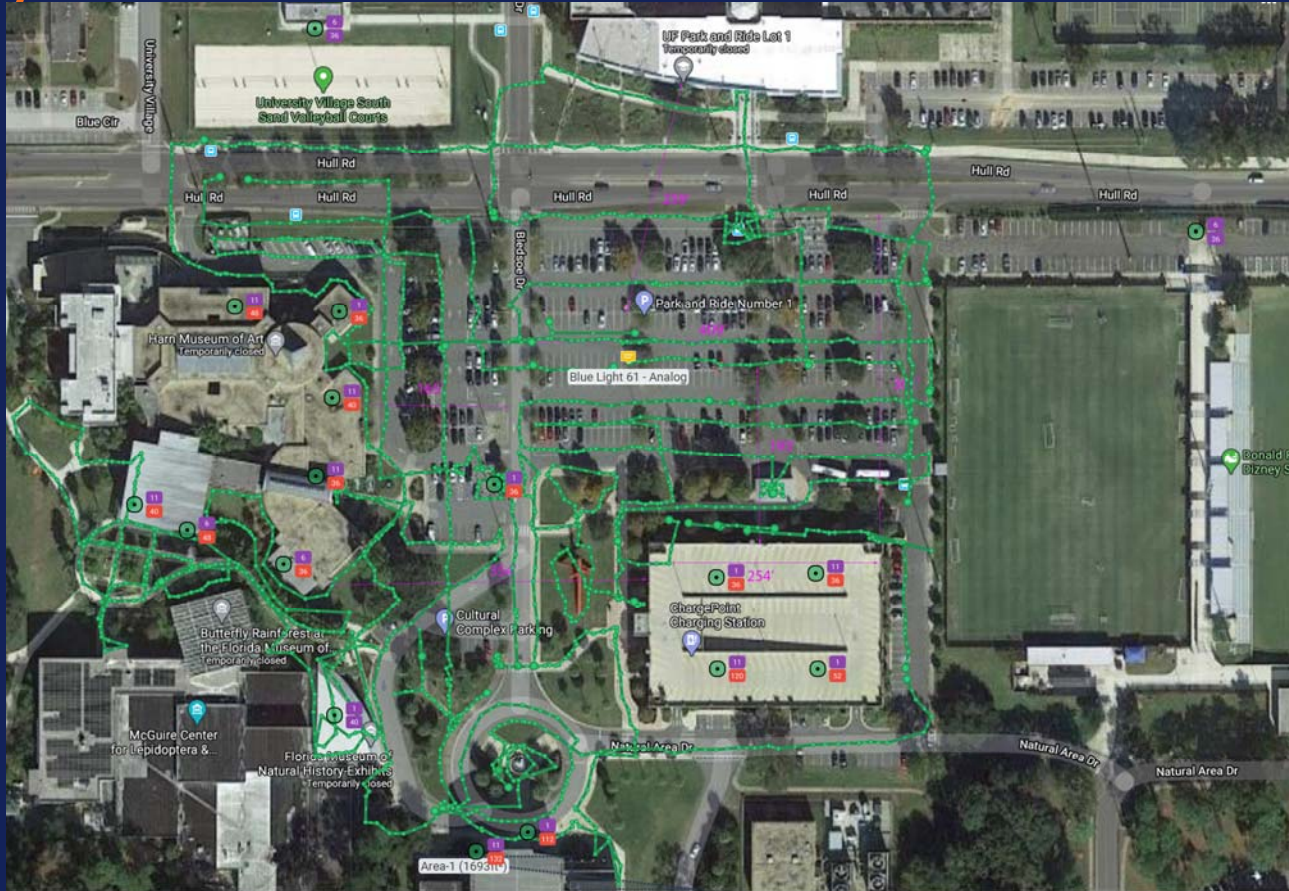

Current Access Points -- Cultural Plaza

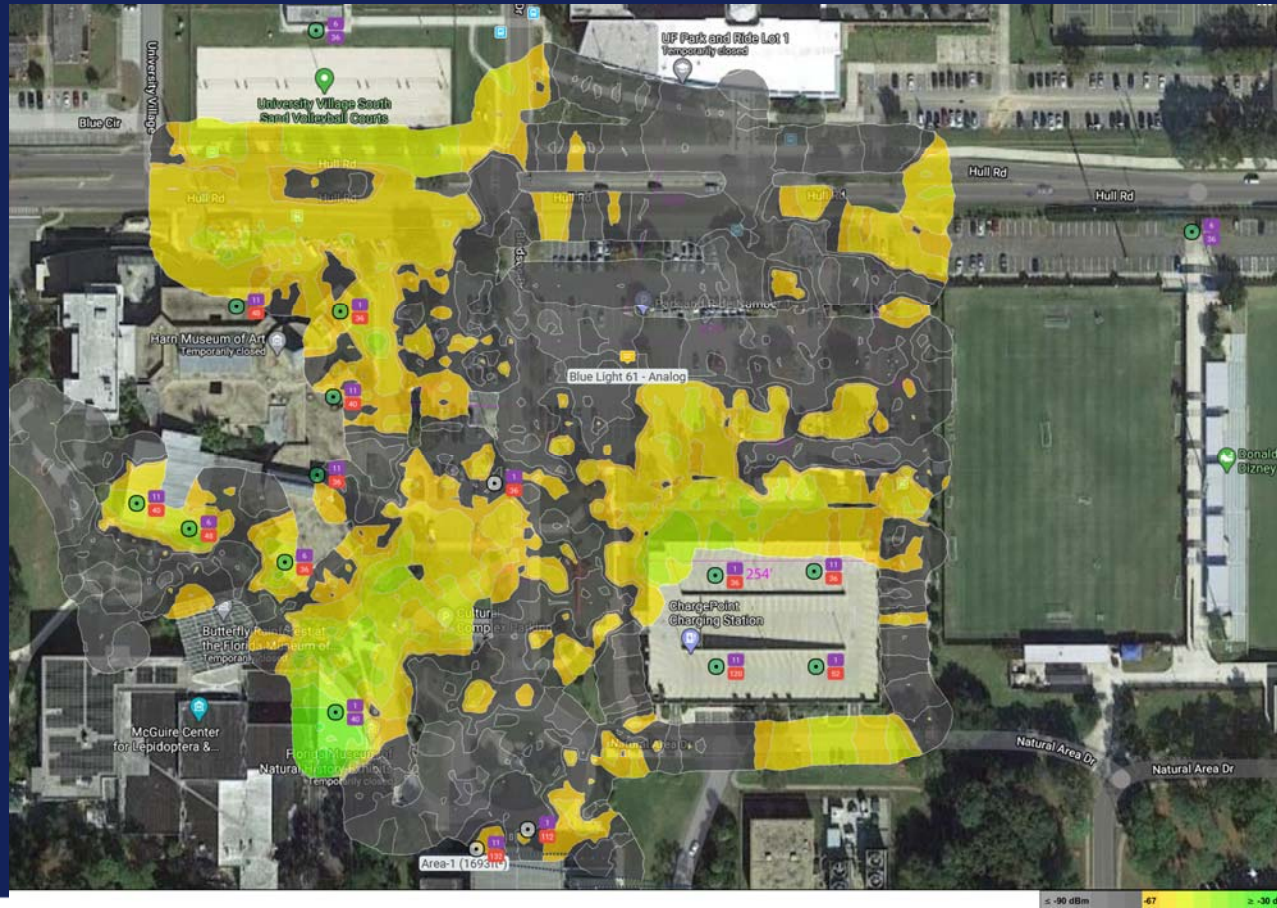

- Temporary wireless bridge from Harn to the parking booth.
- Temporary omni-directional wireless coverage at booth.
- Temporary directional wireless coverage at Performing Arts Center on a moveable stand.
- Permanently installed omni-directional wireless coverage in Parking Garage 11 hanging from 1st floor ceiling.

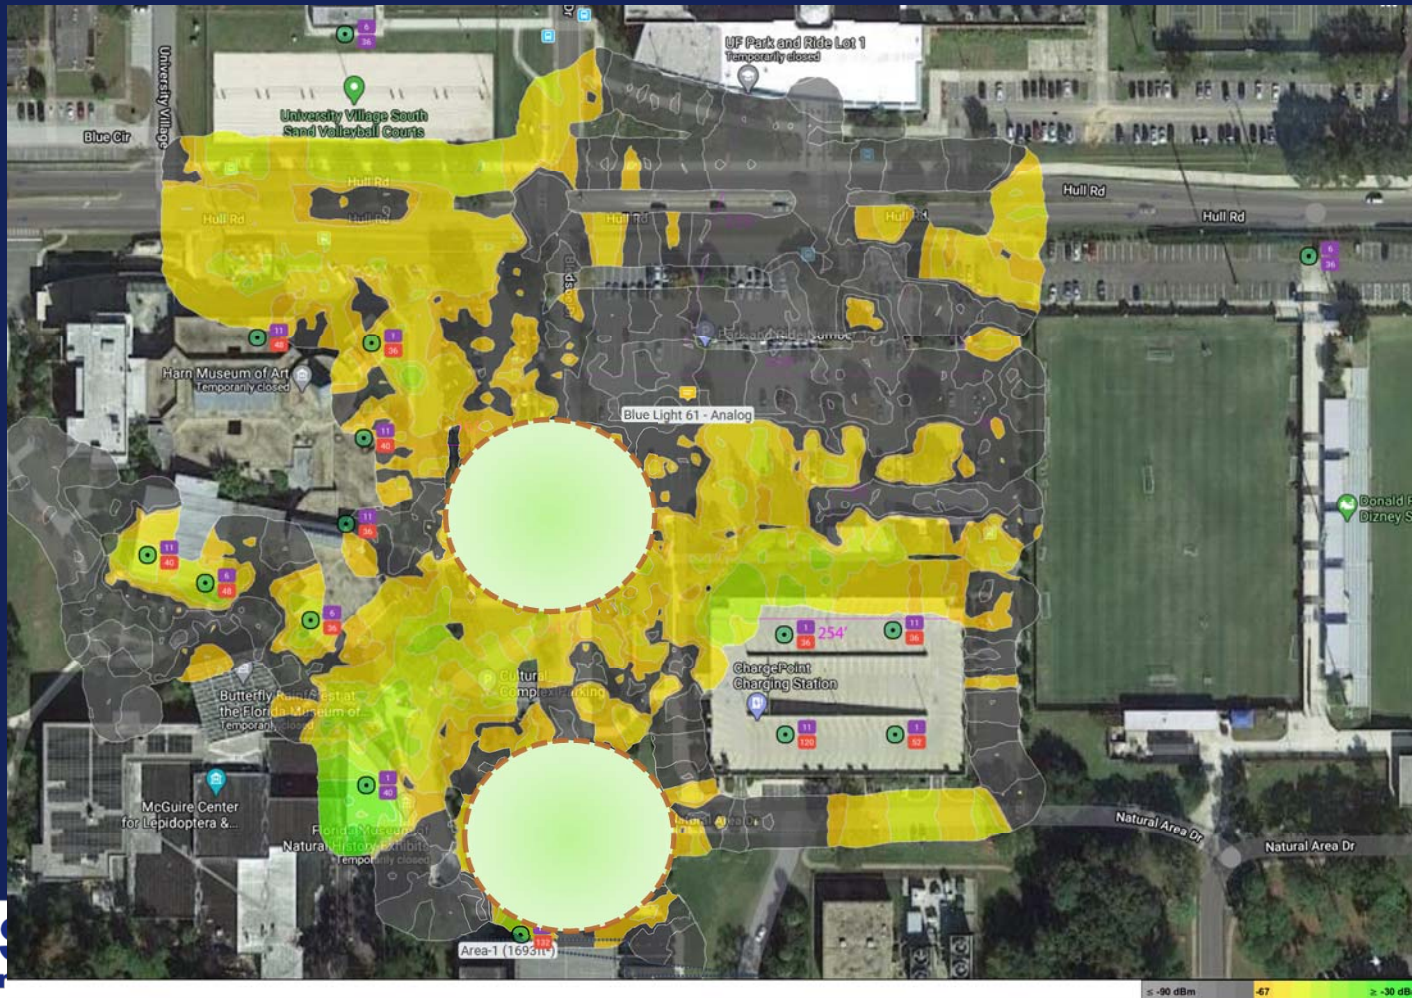

Wi-fi Survey Path – Cultural Plaza

Current Permanent Outdoor Coverage – Cultural Plaza

Current Outdoor Coverage including Temporary Stands for Covid-19

Proposed locations - Outdoor Wireless

Bus Stop or surrounding area

Location 12 - Possible Phase 2.

Harn Museum of Art – Side of building

Locations 1, 2 - Cisco 3802e with Directional Antenna.

Locations 3, 4 - Cisco 3802i with Omni-Directional Antennas.

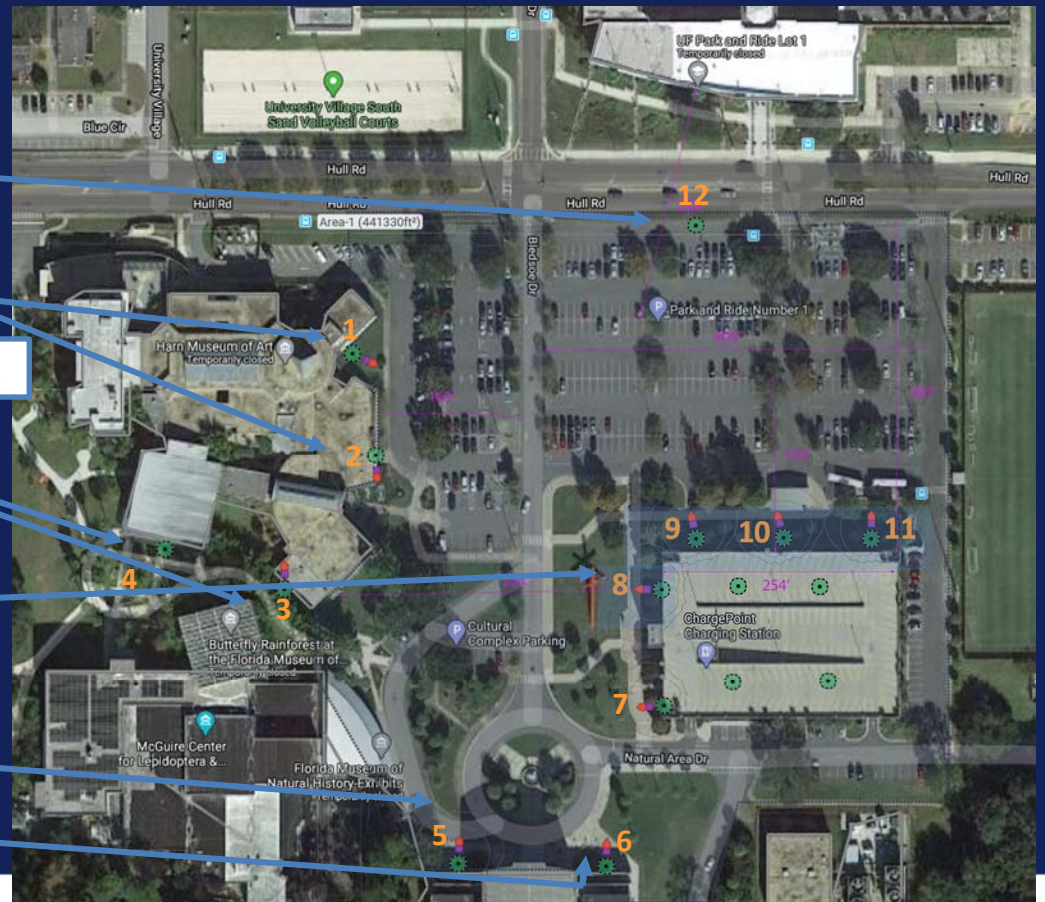

Cultural Plaza Garage 11 – Side of building

Locations 7– 11 - Cisco 3802e with Directional Antenna.

Phillips Center for Performing Arts – Side of building

Location 5 - Cisco 3802e with Directional Antenna.

Location 6 - Cisco 3802e with Omni-Directional Antenna.

Proposed locations – Harn Museum – Location 1

Proposed locations – Harn Museum – Location 2

Proposed locations – Harn Museum – Location 4

Cisco Wireless AP 3802i omni-directional ceiling mount.

Proposed locations – Parking Garage 11– Location 7

Proposed locations – Parking Garage 11– Location 10

Current Access Points – Reitz Union Lawn

- Currently most Reitz Lawn Access points are in red boxes with Cisco 3600 and 3700 Omni-Directional Access Points.
- Most access points are facing outward with antennas facing more up and down .
- Wireless signal is being sent all over, including back into the buildings.

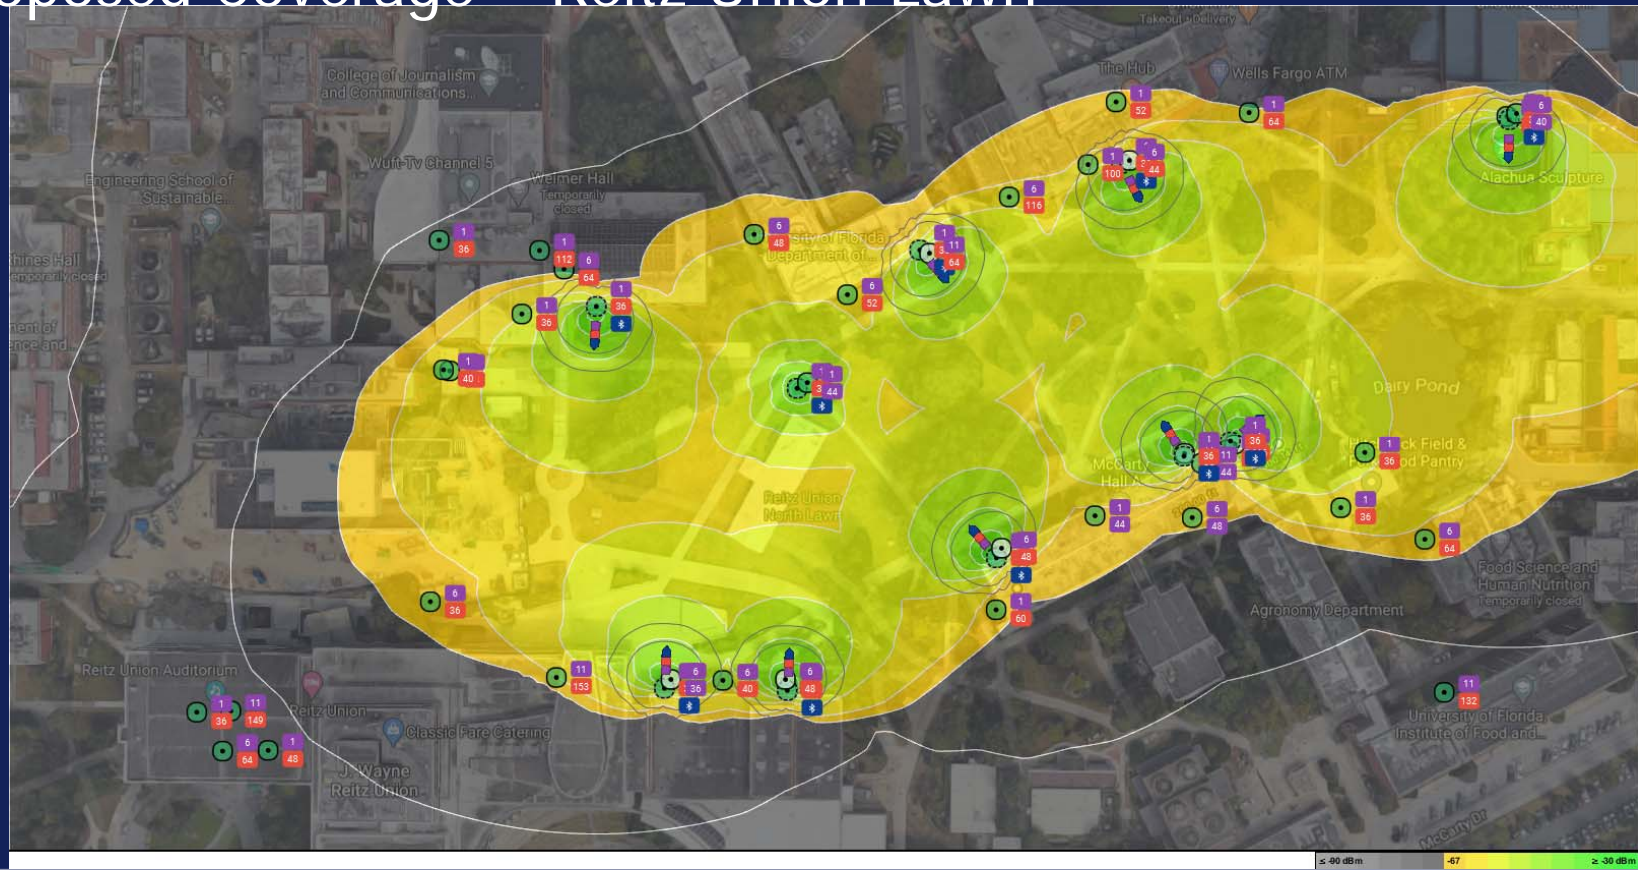

Proposed Access Points – Reitz Union Lawn

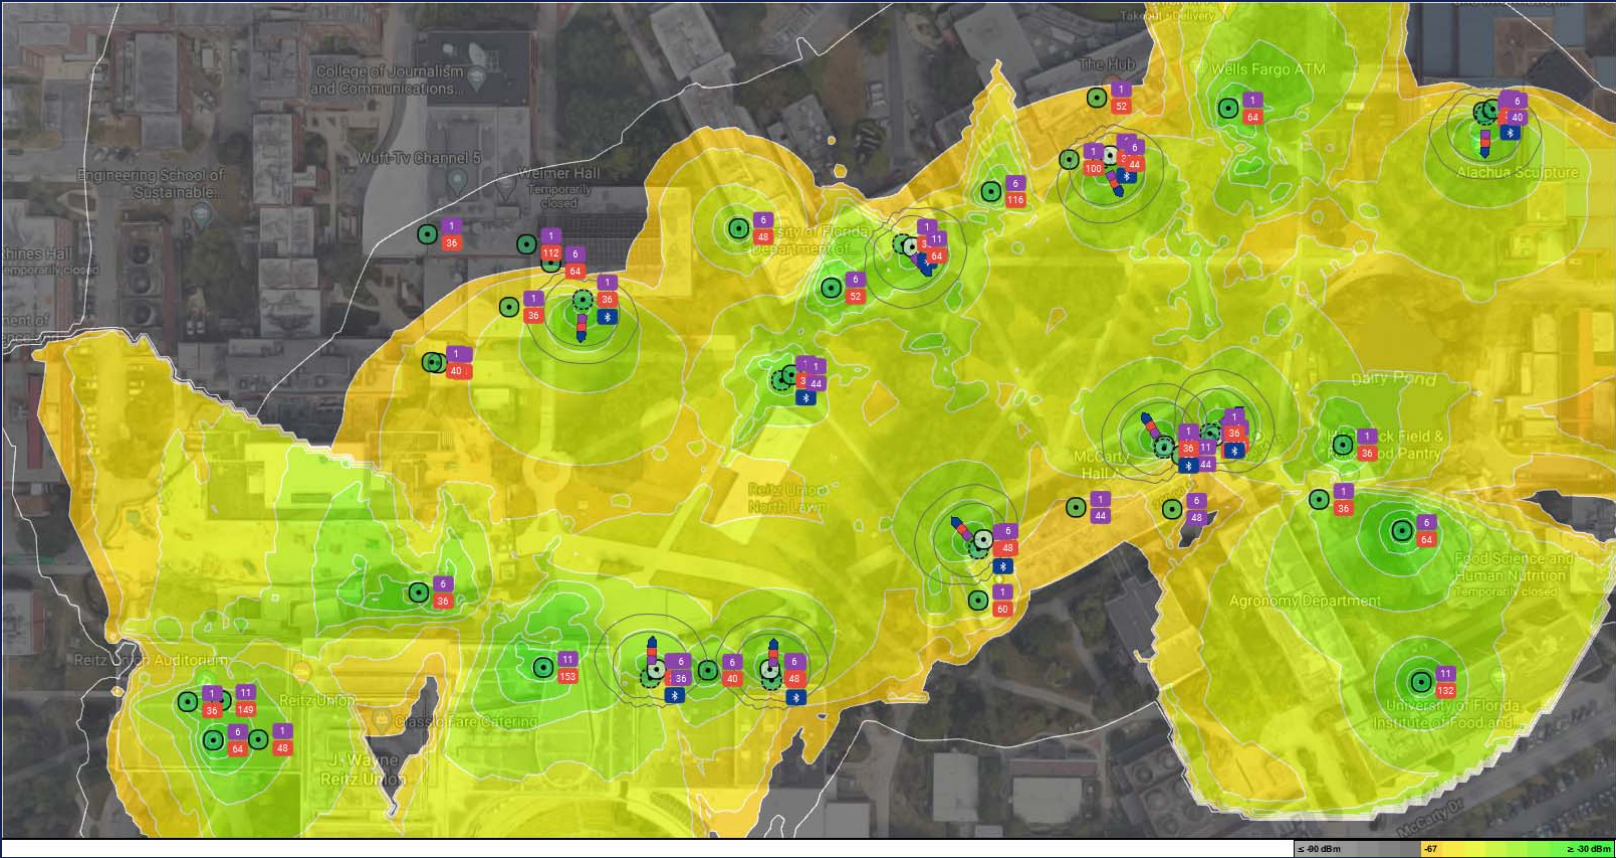

- Upgrade to Cisco 3800e with Patch Directional Antennas
- Quantity 10 - Access Points
- Quantity 9 - External Antennas and Enclosures
- Quantity 1 - Replace a blue light AP with Omnidirectional 3800i
- Direct Wi-Fi signal to areas on the lawn instead of inside buildings.
- Give added capacity and coverage using Cisco 3800i and Cisco 3800e Access points.

Proposed Coverage – Reitz Union Lawn

Overall Coverage with added capacity and focused energy.

Overall Coverage with added capacity and focused energy.

Polycarbonate Enclosure 12x10x6 With Integrated Patch Antenna—White

The TerraWave 12" x 10" x 6" White Enclosure with integrated patch antenna is constructed of polycarbonate plastic, making it a durable, extremely affordable solution. The enclosure features a solid door, latching locks and pre-drilled backplate. In addition, this enclosure has integrated antenna installed on a wing out panel inside the enclosure making it more compact to allow more efficient deployment of your AP. This NEMA 4X enclosure is intended for indoor or outdoor use to protect popular Wi-Fi access points from corrosion, dust, rain, extreme temperatures and unauthorized access or inadvertent contact with the controls and wiring located inside the enclosure.

Every TerraWave enclosure is covered by the company's two-year TerraNet warranty program. For questions and to

System Highlights

- ◊ Robust aluminum back plate that allows for seamless integration with access points.
- ◊ Integrated patch antenna allows you to expand your Wi-Fi coverage.

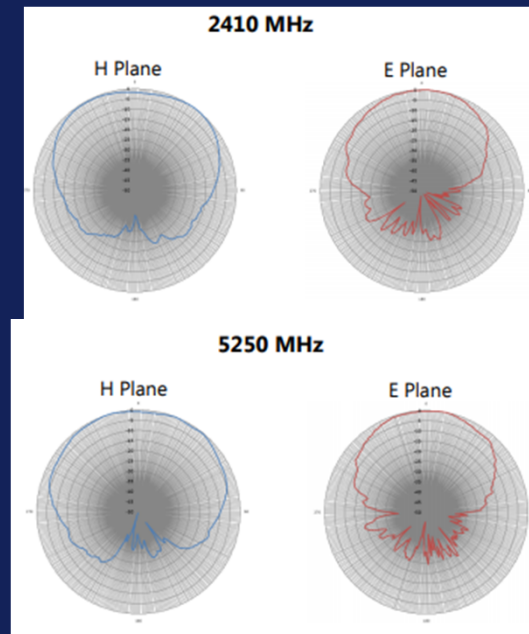

12x10x6 Basic Enclosure with Integrated Patch Antenna

SKU # 508606
Part#: CV12106LO-ODP4T-W

Directional Antenna Specs

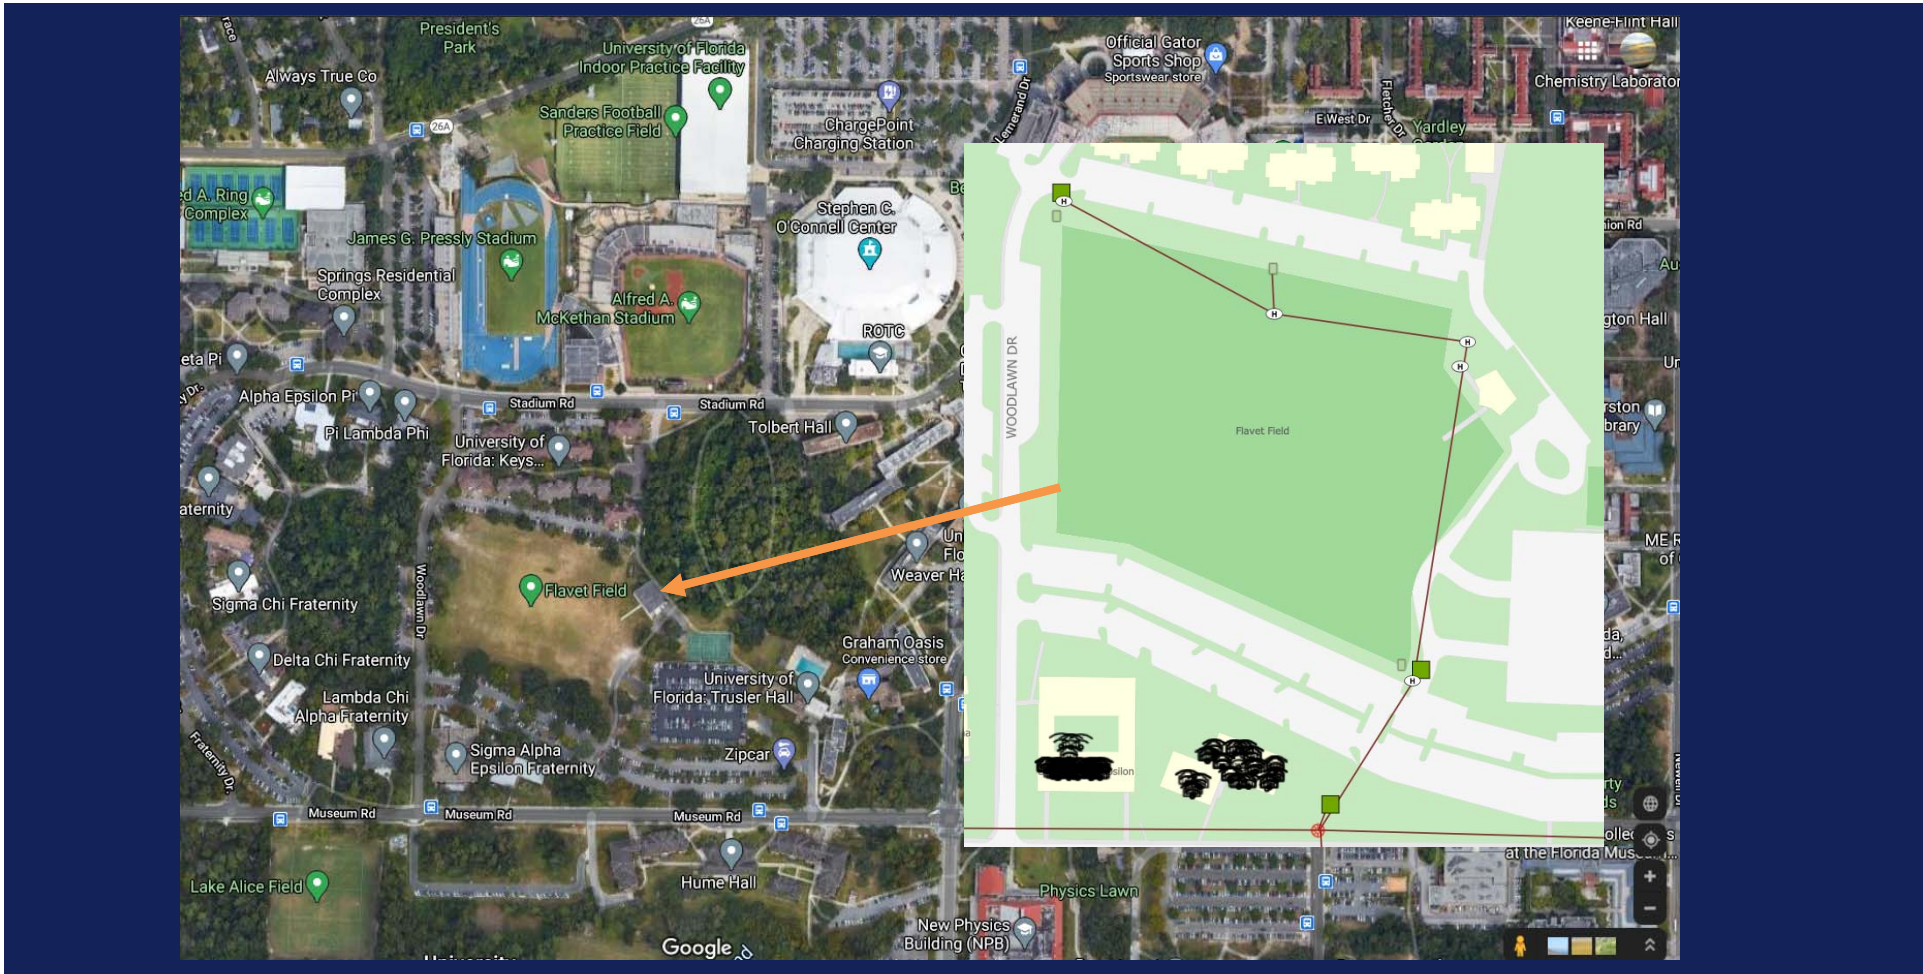

Specifications		
Model	M6060060P1D43602V	
Frequency Range	2400~2500	5150~5850
Bandwidth	100 MHz	700 MHz
Gain	6 dBi	6dBi
Horizontal Beamwidth	105	125
Vertical Beamwidth	60	70
VSWR	≤2.0	≤2.0
Isolation	≥20dB	
Nominal Impedance	50 Ohm	
Polarization	Vertical	
Maximum Input Power	20 W	
Lightning Protection	N/A	
Connector Type	4x RPTNC Plug	
Cable Length	36"	
Dimensions	10" x 5.6" x 1.4"	
Weight	1.2 lbs	
Operating Temperature	-40°F to 158°F	
Wind Load	60 mph	

New Outdoor Coverage – Flavet Field Bandshell
